HAMZA ALIYU IDRIS

Information Technology Graduate | Software Developer | Aspiring AI Researcher

Email: hamzaaliyuzkr@gmail.com **Phone:** +234 901 146 7418 **GitHub:** github.com/Zakiraitech **Location:** Nigeria

PROFESSIONAL PROFILE

Information Technology graduate from the International University of East Africa (IUEA) with a strong foundation in computer science research, full-stack software engineering, and emerging artificial intelligence applications. Proven expertise across web and mobile development frameworks, database architectures, and computer vision technologies. Highly motivated to pursue postgraduate research contributing to Machine Learning, Real-Time Optical Text Detection, and Intelligent Autonomous Systems.

EDUCATION

Bachelor of Science in Information Technology — **Graduation Year: 2025**
International University of East Africa (IUEA)

TECHNICAL SKILLS & COMPETENCIES

Programming Languages
Python, Java, PHP, JavaScript, Dart

Frameworks & Web/Mobile
Laravel, Flutter, HTML5, CSS3, REST APIs

Database Management
MySQL, Relational Schema Design, SQL Optimization

AI & Computer Vision
Image Processing, Text Detection, ML Concepts

SELECTED SOFTWARE DEVELOPMENT PROJECTS

1. Automated Real-Time Text Detection & Audio Translation System
Domain: Computer Vision, OCR & Accessibility Technologies

- Architected an end-to-end vision system capable of localized optical character recognition and real-time audio output generation.
- Applied image pre-processing algorithms to improve text extraction accuracy under varying ambient light conditions.

2. SmartRead AI
Domain: AI-Assisted Mobile Reading & Assistive Tools

- Engineered a cross-platform mobile application using Flutter/Dart integrated with AI modules to assist users with text capture and synthesized voice playback.

3. Student Stress Management System
Domain: Full-Stack Web Development & Student Well-Being

- Designed a web portal incorporating relational MySQL databases and PHP/Laravel backends to provide actionable relaxation tools and stress metrics for university students.

RESEARCH OBJECTIVES & INTERESTS

Seeking fully funded Master's / PhD opportunities in Computer Science, Information Technology, or Artificial Intelligence. Primary research focus areas include Computer Vision, Neural Network Models, Natural Language Processing, and Intelligent Assistive Applications.
